Product Description

Carbon Steel Grade B Thickness 1.5 - 20 mm Square Steel Pipe

Feature:

The square pipe is a name for square pipe, that is, steel pipes with equal side lengths, which are rolled from strip steel through process treatment. Generally, the strip is unpacked, flattened, coiled, welded to form a round tube, and then rolled into a square tube from the round tube and then cut to the required length. The square tube is divided into seamless and welded, and the seamless square tube is formed by extruding a seamless round tube.

Specification:

Application	Structure Pipe	Surface Treatment	galvanized, zinc coated 30um
Alloy Or Not	Non-Alloy	Tolerance	±10%
Section Shape	Square and Rectangular	Processing Service	Welding, Punching, Cutting
Special Pipe	Thick Wall Pipe	Oiled or Non-oiled	Non-oiled
Thickness	1.5 - 20 mm	Invoicing	by theoretical weight
Standard	ASTM A500	Secondary Or Not	Non-secondary
Length	12M, 6m, 6.4M, 5.8M, as the contract requirement	Material	Carbon Steel Grade B
