

Non-Alloy Seamless Steel Pipe Perfect for Industrial Applications

Our Product Introduction

for more products please visit us on pipesteels.com

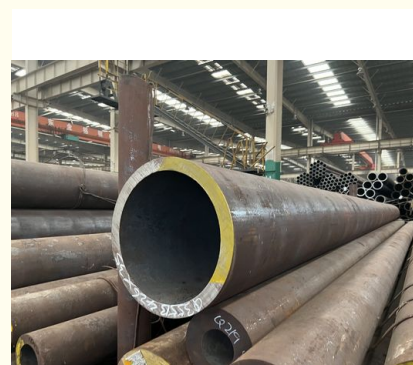

Basic Information

- Place of Origin: USD500-700
- Brand Name: Zhengshen
- Certification: ISO, CE, GOST
- Minimum Order Quantity: 1 Ton
- Price: USD500-700
- Packaging Details: Free Packing
- Delivery Time: 5-8 days
- Supply Ability: 20000Tons/month

Product Specification

- Sample: Available
- Section Shape: ROUND
- Tolerance: $\pm 1\%$
- Ends: Plain End, Beveled End, Threaded End
- Products: Seamless Steel Pipe
- Invoicing: By Theoretical Weight
- Alloy Or Not: Non-Alloy
- Type: Steel Seamless Pipe
- Highlight: **non-alloy seamless steel pipe, industrial seamless steel pipe, seamless steel pipe with warranty**

Product Description

Product Description:

Product Summary: Seamless Steel Pipe

Type: Steel Seamless Pipe

Ends: Plain End, Beveled End, Threaded End

Application: Oil And Gas, Water, Construction, Chemical Industry, Boiler, Heat Exchanger

Products: Seamless Steel Pipe

Section Shape: ROUND

Seamless steel tubing is a type of steel pipe that does not have any welded joints or seams. It is made by piercing a solid billet of steel to create a hollow tube. This manufacturing process results in a pipe that is stronger and more reliable than welded pipes, making it ideal for various applications.

The seamless steel tubing is versatile and can be used in a wide range of industries due to its durability and resistance to corrosion. It is commonly used in the oil and gas industry for transporting petroleum and natural gas. The seamless construction of the pipe ensures a leak-free and reliable flow of fluids.

In the water industry, seamless steel tubing is preferred for water supply systems due to its high strength and ability to withstand high pressure. It is also used in construction projects for structural purposes, as well as in the chemical industry for conveying corrosive fluids safely.

Seamless steel tubing is also widely used in boiler and heat exchanger applications due to its ability to withstand high temperatures and pressures. The seamless construction of the pipe ensures efficient heat transfer and long-lasting performance in demanding environments.

When it comes to ends, seamless steel pipes are available with plain ends, beveled ends, and threaded ends to suit different installation requirements. Plain ends are ideal for welding, while beveled ends are used for butt welding and threaded ends are suitable for connecting pipes with threaded fittings.

Overall, seamless steel tubing is a reliable and durable solution for various industrial applications. Its seamless construction, high strength, and resistance to corrosion make it a preferred choice for oil and gas, water, construction, chemical industry, boiler, and heat exchanger applications.

Features:

Product Name: Seamless Steel Pipe

Alloy Or Not: Non-Alloy

Tolerance: $\pm 1\%$

Section Shape: ROUND

Surface Treat: Bare, Oiled, Black Painting

Products: Seamless Steel Pipe

Technical Parameters:

Surface Treat	Bare, Oiled, Black Painting
Special Pipe	API Pipe, Thick Wall Pipe
Section Shape	ROUND
Technical	Hot Rolled Or Cold Drawn
Invoicing	By Theoretical Weight
Application	Oil And Gas, Water, Construction, Chemical Industry, Boiler, Heat Exchanger
Ends	Plain End, Beveled End, Threaded End
Alloy Or Not	Non-Alloy
Tolerance	$\pm 1\%$
Type	Steel Seamless Pipe

Applications:

Seamless steel tubing from Zhengshen is a versatile product that finds a wide range of application occasions and scenarios due to its high quality and durability. Originating from a reputable manufacturer in the price range of USD500-700, this seamless steel pipe is suitable for various industries and projects.

With different ends options such as Plain End, Beveled End, and Threaded End, Zhengshen's seamless steel tubing can be easily installed and integrated into different systems. The availability of Special Pipes like API Pipe and Thick Wall Pipe further enhances the product's versatility, making it suitable for demanding applications.

Featuring a Section Shape of ROUND and made from high-quality Carbon Steel, this seamless steel tubing is known for its strength and reliability. It is commonly used in industries such as Oil and Gas, Water, Construction, Chemical Industry, Boiler, and Heat Exchanger. For oil and gas applications, Zhengshen's seamless steel tubing offers excellent resistance to corrosion and high pressure, making it a

preferred choice for pipelines and drilling operations. In the construction industry, the product is used for structural purposes due to its durability and ease of installation.

In the chemical industry, this seamless steel tubing is ideal for transporting various chemicals safely and efficiently. For boiler and heat exchanger applications, the product's high temperature and pressure resistance make it a reliable choice for ensuring efficient heat transfer.

Overall, Zhengshen's seamless steel tubing is a dependable product with a wide range of applications, making it a valuable asset in various industries and scenarios.

Customization:

Brand Name: Zhengshen
Place of Origin: USD500-700
Products: Seamless Steel Pipe
End Protector: Plastic Pipe Cap
Tolerance: ±1%
Application: Oil And Gas, Water, Construction, Chemical Industry, Boiler, Heat Exchanger
Ends: Plain End, Beveled End, Threaded End
