

## API Seamless Steel Pipe with Beveled End Designed to Meet Stringent Industry Standards and Specifications

Our Product Introduction

for more products please visit us on [pipesteels.com](http://pipesteels.com)

### Basic Information

- Place of Origin: USD500-700
- Brand Name: Zhengshen
- Certification: ISO, CE, GOST
- Minimum Order Quantity: 1 Ton
- Price: USD500-700
- Packaging Details: Free Packing
- Delivery Time: 5-8 days
- Supply Ability: 20000Tons/month

### Product Specification

- Sample: Available
- End Protector: Plastic Pipe Cap
- Invoicing: By Theoretical Weight
- Surface Treat: Bare, Oiled, Black Paintin
- Ends: Plain End, Beveled End, Threaded End
- Tolerance:  $\pm 1\%$
- Technical: Hot Rolled Or Cold Drawn
- Application: Oil And Gas, Water, Construction, Chemical Industry, Boiler, Heat Exchanger
- Highlight: **API seamless steel pipe with beveled end, seamless steel pipe for industry standards, beveled end seamless steel pipe**

**Product Description:**

Seamless steel pipe is a highly versatile and essential product widely used across various industries due to its superior strength, durability, and corrosion resistance. Manufactured from high-quality carbon steel, this seamless steel pipe is designed to deliver exceptional performance in demanding environments. Unlike welded pipes, seamless steel tubing is produced through a process that eliminates any joints or seams, resulting in a uniform structure that enhances its mechanical properties and reliability. This seamless construction makes it particularly suitable for applications that require high pressure and temperature resistance, ensuring safety and longevity in critical operations.

The seamless steel tubing we offer is available with a range of surface treatments to meet different operational needs and environmental conditions. Customers can choose from bare steel, oiled finishes, or black painting depending on the intended use and aesthetic preferences. The bare steel option provides a clean, untreated surface that is ideal for further fabrication or coating, while the oiled finish offers temporary corrosion protection during storage and transportation. The black painting, on the other hand, adds an additional protective layer against rust and improves the pipe's visual appeal, making it suitable for exposed applications.

One of the key features of this seamless steel pipe is the inclusion of a plastic pipe cap as an end protector. These plastic pipe caps are designed to safeguard the ends of the pipes from damage during handling, shipping, and storage. They prevent dirt, moisture, and debris from entering the pipe, maintaining the cleanliness and integrity of the internal surface. This is particularly important in industries like oil and gas, chemical processing, and water transportation, where contamination can severely impact the performance of the pipeline system.

In addition to its robust construction and protective features, seamless steel tubing is highly adaptable and can be customized to fit various dimensions and specifications. We understand that different industries have unique requirements, which is why we also provide samples upon request. This ensures that clients can evaluate the quality and suitability of the seamless steel tubing before placing large orders, facilitating informed decision-making and customer satisfaction.

**Features:**

Product Name: Seamless Steel Pipe

Special Pipe Types: API Pipe, Thick Wall Pipe

Material: High-quality Carbon Steel

Tolerance: Precise ±1% dimensional tolerance

Technical Process: Available in Hot Rolled or Cold Drawn

Product Range: Various sizes of Seamless Steel Pipe

Features: Durable and reliable Seamless steel tubing for diverse applications

Quality: Superior Seamless steel tubing ensuring strength and corrosion resistance

Applications: Widely used Seamless steel tubing in oil, gas, and construction industries

**Technical Parameters:**

Ends	Plain End, Beveled End, Threaded End
Material	Carbon Steel
Technical	Hot Rolled Or Cold Drawn
Surface Treat	Bare, Oiled, Black Painting
Section Shape	ROUND
End Protector	Plastic Pipe Cap
Type	Steel Seamless Pipe
Special Pipe	API Pipe, Thick Wall Pipe
Products	Seamless Steel Pipe
Sample	Available

**Applications:**

The Zhengshen Seamless Steel Pipe is a high-quality product originating from the USD500-700 price range, designed to meet diverse industrial needs. Manufactured using advanced hot rolled or cold drawn technical processes, this seamless steel tubing offers exceptional strength, durability, and precision, making it an ideal choice for various demanding applications. The seamless steel tubing ensures superior performance without any welding joints, which enhances its structural integrity and resistance to pressure and corrosion. Seamless steel tubing from Zhengshen is widely used in the oil and gas industry for pipelines that transport fluids and gases under high pressure. Its seamless construction ensures there are no weak points, making it reliable for critical applications such as drilling rigs, refineries, and offshore platforms. Additionally, the seamless steel tubing is commonly employed in the automotive and aerospace sectors, where it is used for manufacturing hydraulic lines, engine components, and structural parts that require high strength-to-weight ratios.

In construction and infrastructure projects, Zhengshen seamless steel pipes are valued for their robustness and longevity. They are used in building frameworks, scaffolding, and mechanical support systems, where safety and durability are paramount. The seamless steel

tubing can also be found in manufacturing industries, serving as components in machinery, boilers, heat exchangers, and pressure vessels. The product's versatility is further enhanced by its surface treatment options, including bare, oiled, or black painting, which provide additional protection against rust and environmental damage. Overall, Zhengshen's seamless steel tubing stands out as a reliable, versatile, and high-performance solution suitable for a wide range of application occasions and scenarios, including industrial manufacturing, energy exploration, infrastructure, and mechanical engineering projects.
